Frontend developer with 2+ years of experience developing web applications with React.js for SMEs in the region and the US. I have a high focus on responsive design, support for different browsers, SEO friendly, and remarkable execution performance. I am self-taught and communicative. I am currently looking for remote opportunities in the tech industry as a front-end developer with React.

## Experience

**Fulltime Force, Full Stack Developer** — *May 2022*

**Innovation (Peru)** (Intern Project)
- Develop a candidates comparison module that helped the recruitment team to include the top 10% of the best candidates for the company.
- Improve by 60% user experience and reduce content redundancy by implementing UI changes.
  **Tech Stack::** React.js, Redux, react-router, redux-toolkit, TypeScript, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, Tailwind, Figma, Postman, JWT.

**ViaFasken (EEUU)** (customer)
- Reduced by 30% the number of vulnerabilities by collaborating in the implementation of a double authentication factor that improves the security of the application.
- Reduced by 50% the number of weekly tasks by providing support to the IT team in the deployment of new features in a short time.
  **Tech Stack:** React.js, Redux, react-router, redux-toolkit, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, Tailwind, Figma, Postman, JWT.

**Gunderson (EUU)** (customer)
- Reduced by 20% the number of bugs and reports by implementing unit testing and code refactoring.
- Increased interactions by 30% and reduced execution time by 60% by implementing UI changes and improvements in site navigation.
  **Tech Stack:** React.js, Redux, react-router, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, SASS, Figma, Postman. JWT.

**ULEAM, Frontend Developer (Ecuador)** — *March 2021 – March 2022*
- By creating an administrative panel where businesses could submit their job openings, I was able to quadruple the amount of job offers published each month.
- I built a module for applying for graduate students that allowed a 15% success rate in job applications.
  **Stack tecnológico:** React.js, Redux, react-router, redux-thunk, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, Figma, MaterialUI.

**BESE, Fullstack Developer (Ecuador)** — *May 2020 – September 2020*
- Reduced by 30% the development time in the different teams by collaborating in the implementation of a Rest API infrastructure, enabling the data for the app.
- Increased the company's profits by 20% by providing relevant information at the Management level, with the implementation of a POS service and a front office.
  **Tech Stack:** React.js, Redux, react-router, redux-thunk, TypeScript, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, Figma, JWT, MaterialUI.

**Kans, Frontend Developer (Ecuador)**— *March 2019 – February 2020*
- Reduced the duplication of roles by 100% through the development of a module for the administration of user accounts that allows setting roles, permissions, and responsibilities of the staff.
- Reduced by 20% development time by adding new views and components and including style libraries like Bootstrap and Font Awesome.
  **Tech Stack:** React.js, Redux, react-router, redux-thunk, Node.js, Express, MongoDB, Mongoose, HTML5, CSS3, Electron.js, Bootstrap, FIrebase.
